Wholesale Trade List for Fall 1917

This List Cancels All Previous Editions.

SHIPPING—Please give definite shipping directions, also whether you desire shipment to be made by freight or express. Also route if possible. If no directions are given we will forward to the best of our judgment without assuming responsibility, as ALL GOODS TRAVEL AT PURCHASER'S RISK AND EXPENSE. As every care and attention is given to packing and shipping, risks of every description, accidents or delays of carriers, are to be borne by the purchaser. When losses occur by detention, claim should be at once made on the carriers. Purchasers have the right to fully examine the goods ordered, or to have them examined by anyone appointed by them before they leave our nursery. Our close proximity to Chicago, the great railway center, affords direct connection with all the leading lines in the country, and assures our customers quick service and low Chicago rates.

PRICES—The prices quoted are net, boxing extra, and are as reasonable as is consistent with first quality stock carefully graded and properly handled, that it may reach destination in the best possible condition. Should there be any reason for complaint, we must be notified promptly within five days after arrival of goods at destination, otherwise any claims or complaints will not be entertained. We make it a point to give all reasonable claims proper consideration. Should some size or variety called for in the order be exhausted, we reserve the right, unless otherwise instructed, to supply some other variety or size nearest to it. Prices are limited to the wholesale trade. Stock furnished in quantity as follows:

RATES—Five of the same variety and size at the ten rate. Six of same variety and size at the dozen rate. Fifty of the same variety and size at the 100 rate. Five hundred of the same variety and size at the 1,000 rate. We grade carefully, quality being our watchword.

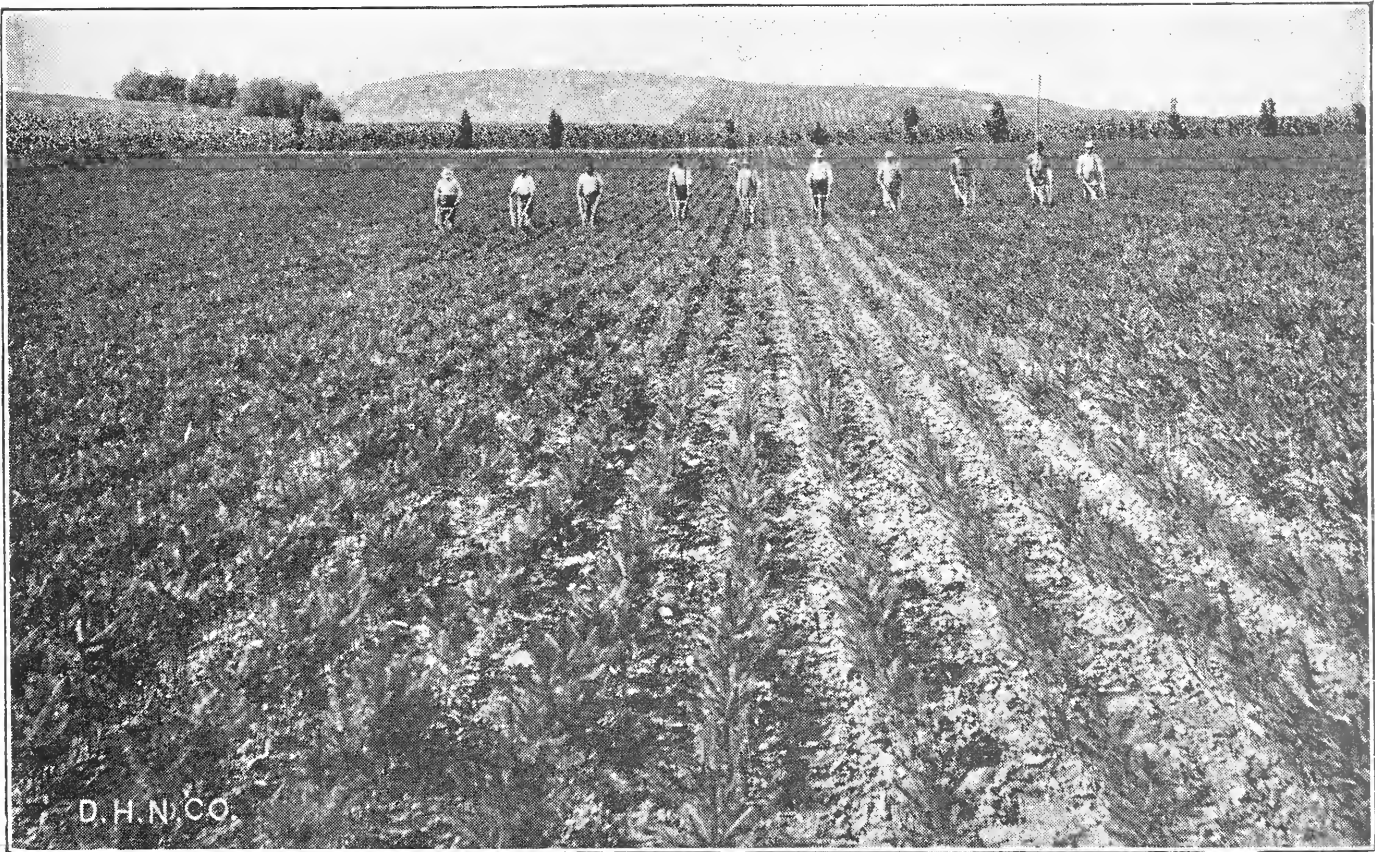

TERMS—Net cash, first orders from all firms not having an account with us should be accompanied with full cash remittance. To customers of approved credit or who supply satisfactory trade reference the usual terms will be extended.

BOXING AND BALES—Boxing and bales will be charged for at actual cost of material used. We make no charge for delivery to the railway station.

GUARANTEE—We exercise the utmost care and diligence to have our varieties true to name and on proper proof will replace all trees that may prove otherwise, or refund the amount paid. At the moderate price at which we sell our goods we give no warranty, expressed or implied, except genuineness, and that goods are packed and shipped according to our best methods, the purchaser assuming all risk and responsibility of the arrival at destination, planting, growth and life of stock. No agent or representative can alter these terms. If the purchaser does not accept the goods on these terms they must be returned to us at once and any money paid us for them will be refunded. All orders are accepted subject to arrival, and without engagement, and upon condition that they shall be void should any injury befall the stock from frost, hail, drought, or other causes over which we have no control before shipment, and void also at our option should we be prevented from filling order by strikes or causes over which we have no control.

SPECIAL NOTICE—Correspondents are requested to use their printed business letterheads. This list is for the trade only and in justice to our trade customers, we use every possible effort to limit the distribution of trade prices to those we know to be entitled to receive them. **USE PRINTED STATIONERY.**

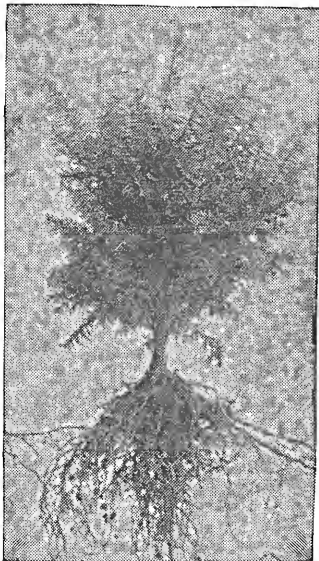

LOCATION—We are situated in Northern Illinois, on well drained, rich, fertile soil. Located thirty-five miles west of Chicago on the Galena division of the C. & N. W. Ry., as well as the A., E. & C. interurban electric system. Visitors are always welcome. For complete directions for reaching Nursery see page 24.

The hand cultivators at work in block of 1,000,000 standard field transplanted Evergreens.

Hill's Standard Field Transplanted Evergreens

Good Hill quality Evergreens do not just happen. We put the Hill quality into them deliberately in numerous ways. First—Our soil and climate is ideal for Evergreen culture. Second—We develop the strength and vitality of our stock (so necessary for successful removal and shipment) by actually root-pruning and transplanting at definite intervals. Third—By our system of digging, handling and packing, whereby Hill's Evergreens can travel the longest distance with safety. Hill's Evergreens are always freshly dug, generously graded and carefully packed. You get no culls, as they are consigned to the brush pile.

Hill Standard Field Transplanted Evergreen. Note Splendid Root System.

Hill's Evergreen Seedlings

Our Leading Specialty. Grown on Immense Scale. Patronize Headquarters.

The propagation of Evergreen seedlings has been one of our specialties for a great many years. Our soil and climate is especially adapted to their culture. Great care is exercised in seed selection so that only hardy dependable types are produced.

We recommend bedding out Evergreen seedlings under shade in frames for a year or two before planting out in open field rows. Plant in rows about one inch apart and rows four inches apart in the frame, so the soil can be kept loose with a hand weeder. Frequent cultivation is just as important as watering.

Variety—	Size Inch	Descrip- tion	Age Year	100	1,000

Koster's Blue Spruce

Described by an eminent horticulturist as a "marvel of beauty." It grows to perfection in all parts of the country and is absolutely hardy.

Hardy, long-lived, sure to grow, rich, gorgeous silvery steel-blue foliage.

Truly a sensational triumph in Evergreen growing. It excites the wonder and admiration of all.

SPECIAL TRADE OFFER

1-1½ ft. Balled
and Burlapped

\$1.50 Each, \$12.50 per 10

Blocks of Specimen Evergreens, principally Junipers, Hemlocks and Pines

Hill's Specimen Evergreens and Conifers

B&B—Balled and Burlapped

Hill's Specimen Evergreens are all perfect specimens, having good roots and symmetrical tops, owing to frequent transplanting, constant cultivation and root-pruning, shearing and staking. Hill's Specimen Evergreens will please your most exacting customers.

In comparing our prices with those of other growers, remember that height alone cannot by any means establish values. An Evergreen tree grown close and crowded in the row may be exactly the same height as a Hill Specimen Evergreen, but will not be as heavy, compact, symmetrical, or have as good roots. Hill's Specimen Evergreens are all grown in wide rows with ample room for development of both root and top.

Constant transplanting and root-pruning gives Hill's Specimen Evergreens masses of fine, fibrous feeding roots, which, together with constant shearing, results in heavy, bushy, symmetrical tops and insures the success of Hill's stock in the hands of the planter.

Every Hill Specimen Evergreen is separately dug by hand with a solid ball of earth about the roots. In some localities it is impossible to dig Evergreens with a solid ball of earth on account of loose, sandy, rocky soil, which will not adhere to the roots. Our rich black prairie loam contains just enough clay to give it good texture and when interwoven with masses of fine fibrous feeding roots, easily holds in place. As additional protection, each earth ball is securely tied in burlap.

Hill Specimen Evergreens are always worth the price you pay for them; will never disappoint you and will be found the most economical in the long run.

Specimen Evergreen Showing "Hill Way" of Ball and Burlap. Roots Undisturbed.

The Blue Spruce

We are headquarters for this splendid variety, having specialized in them for years, and notwithstanding the unusual demand, have succeeded in building up a magnificent stock (without doubt the largest in the world). We offer two types as below, and in ordering from our immense stock of choice trees you may rely upon receiving both in color and form "specimens" in every sense of the word. For prices on Colorado Blue Spruce Seedlings see page 15. For prices on transplants see page 4.

PICEA PUNGENS KOSTERIANA GLAUCA

All Hill specimen Evergreens are hand dug with a solid ball of earth which is securely tied in burlap. When handled this way they put on a good growth the first season.

Hill's Dwarf Evergreens

In New, Rare and Choice Varieties, Especially Adapted for Rockeries, Terraces, Foundation Planting, Japanese Gardens, Etc.

Our collection of Dwarf Evergreens is by far the most complete and extensive to be found anywhere. The stock is bushy, thrifty, well grown, and owing to frequent transplanting can be depended upon to give complete satisfaction. This stock is all dug and packed with extreme care so as not to break or bruise the branches or deform the natural shape of the trees. Like all Hill specimens, these trees are carefully hand-dug with large solid balls of earth, so that the masses of fine fibrous feeding roots are not disturbed in any way.

Taxus Canadensis (American Yew) a splendid dwarf growing variety.

Seedling beds in Hill Nursery. European Larch at left. Scotch Pine in center.
One year Pines under racks at right.

Hill's Seedlings, Cuttings, Grafts, Etc.

For Lining or Bedding Out

The propagation of young Evergreens and Deciduous stock suitable for lining or bedding out has been a specialty with us for over half a century. That our stock gives satisfaction is attested by a rapidly growing list of customers, whom we supply year after year. Our seedling bed area alone covers upwards of fifty acres, and our annual output of rooted cuttings and grafted stocks is in the hundreds of thousands. All stocks are strong, healthy and well rooted. Quality is our watchword. Try us this year. Our plants are always freshly and carefully dug, properly graded to sizes, plainly labeled and securely tied in bundles of 50 and 100 each.

Special Notice.—For best results, small Evergreen seedlings or cuttings should be bedded out in frames close together for one or two years under shade, where they can be watered, after which they can be transplanted out into open field rows. The observance of this plan is quite essential and perfect stands should result. Furthermore, in handling young Evergreens as above, we recommend the smaller sizes as giving just as satisfactory results as the extra large sizes.

Gentlemen:

Clayton, Mo.

The car of evergreens is unloaded, all planted, watered and mulched, and they look splendid. They arrived with larger balls, in better condition than any of the other trees. Really, I have never seen better balls, or as good as the ones you turn out.

The small evergreens were handled exactly as you advised, and we expect excellent results.

Deciduous Shade Trees

Variety—	Size	Each	10	100	1,000

One of the many uses of Hill's Hardy Evergreens.

Hill's Choice Decorative Stock

Hill's Complete Assortment of Hardy Evergreens and Boxwoods for Window Boxes, Urns, Etc.

Very tasty boxes can be made up with various arrangements of Evergreens. There are a number of ways of filling boxes, almost any idea your customers have can be carried out. Placed closely together, all of the same height, give a hedge-like appearance; high at the ends and low in the center, affords with a little clipping, a graceful curved effect. Tall trimmed plants at the ends with a lower compact line straight across presents a good appearance. Each tree planted so as to show its individuality, is another plan, while a box filled with a number of varieties gives a shaded color effect that is very attractive. The outside Fall and Winter decoration of the business houses, hotels, restaurants, city and suburban dwellings with hardy ornamental Evergreens is rapidly becoming the custom in all the large towns and cities.

HARDY EVERGREENS FOR WINDOW BOXES

(Especially grown bushy stock)

	Each	Doz.	100

Famous Florist Pleased

Chicago, Ill.

"Stock received in excellent shape. Everything very satisfactory.

ERNEST WEINHÖBER, Florist.

Japanese Dwarf Potted Evergreens

Their attractive appearance, easy culture, hardiness, distinctive originality and longevity have made these Japanese Potted Evergreens most popular. They are grown in three convenient sizes, each size containing a good assortment of varieties. All are well established in odd and fancy Japanese Glazed Pots, which makes them most attractive.

Well established in odd and fancy Japanese Pottery.

		Each	Pair	Doz.
Size No. 1, Large	(Estimated height 10 to 18 inches).....	\$2.50	\$4.75	\$31.00
Size No. 2, Medium	(Estimated height 8 to 13 inches).....	1.75	3.20	18.00
Size No. 3, Small	(Estimated height 3 to 7 inches).....	.75	1.40	7.80

Miniature Xmas Trees

They are particularly adapted for use as table pieces during the holiday season. All are shapely, nursery grown trees and are far superior to the slim, flimsy wild stock offered by jobbers. The moss balls keep the trees in good condition until after the holiday season. Shipment can be made whenever wanted. (For Christmas trees to grow on in the nursery see page 7.)

TO THE TRADE

We wish here to express sincere thanks to our many friends and patrons in the trade who have written kind words relative to the quality of stock and treatment they have received from us the past season. We greatly appreciate these expressions of confidence and shall endeavor to maintain the reputation they have so kindly given us.

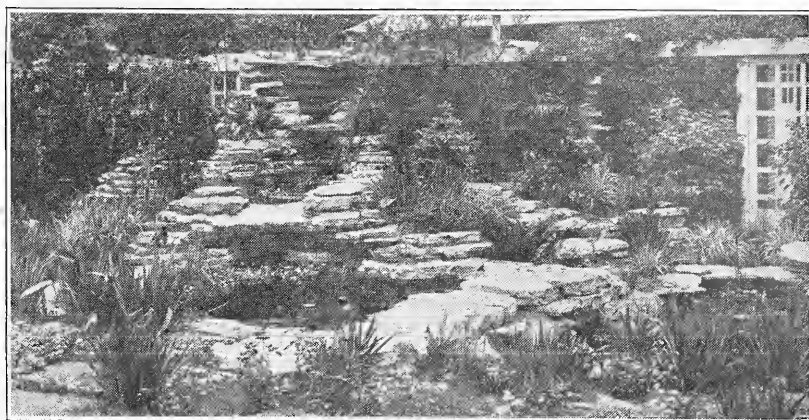

HILL QUALITY

The name of D. Hill has come to be synonymous with "High Quality" in Evergreens and other choice nursery stock. Over half a century of conscientious effort, unbounded enthusiasm, a close study of the value of every new specie introduced; and above all an ambition to make new friends and keep the old, has been the method by which this high position has been reached.

YOUR SUCCESS WITH OUR STOCK

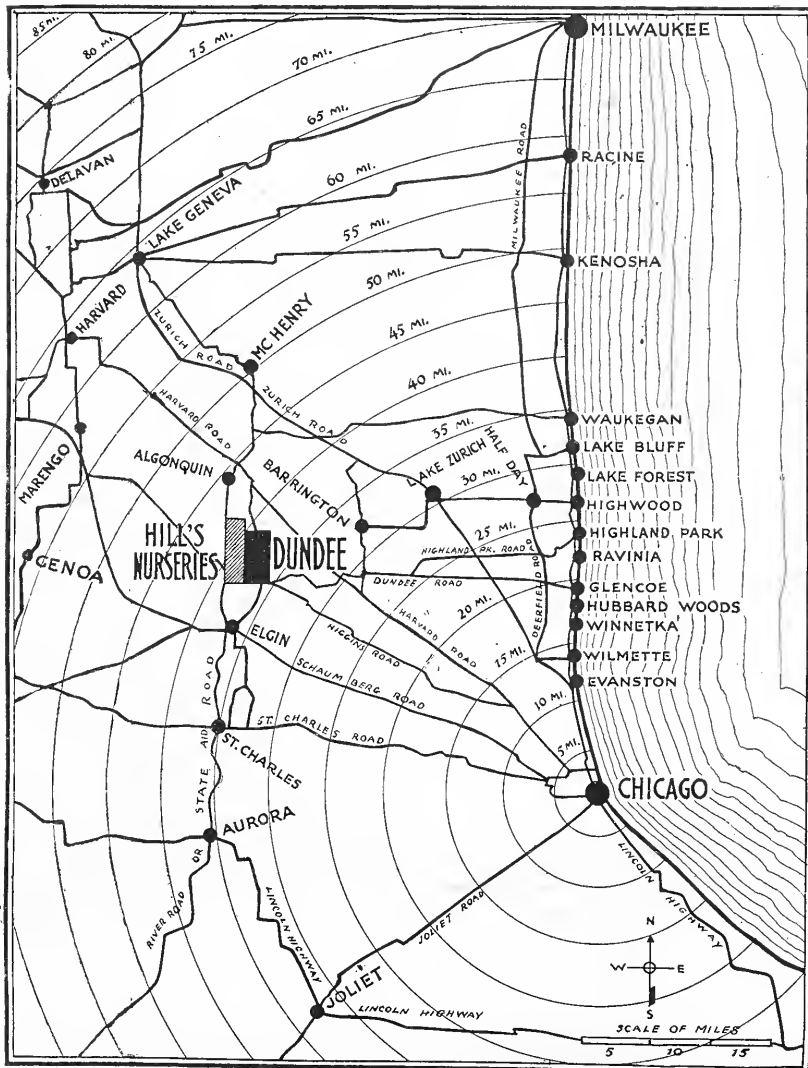

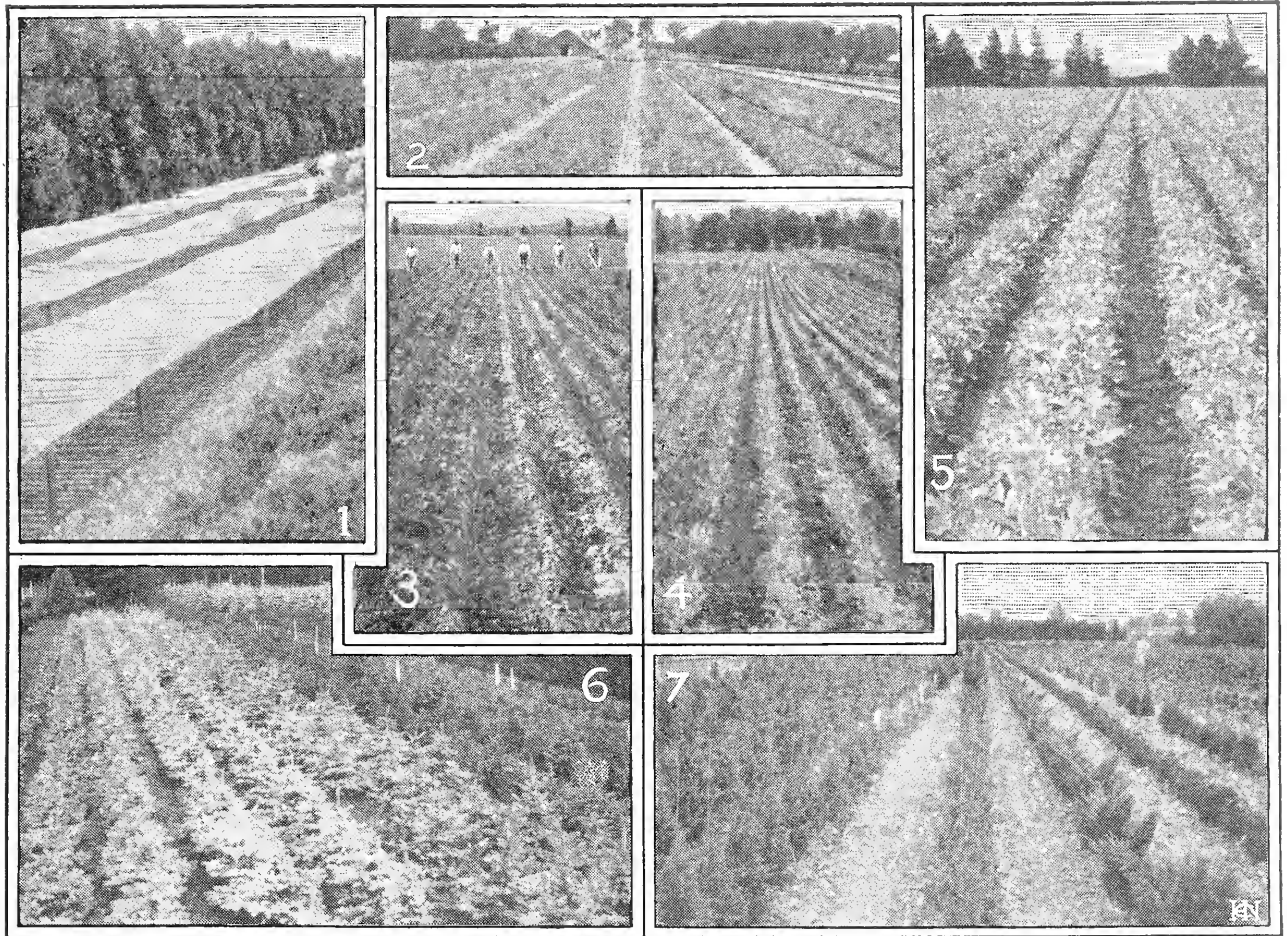

is a matter in which we are mightily interested. Therefore we endeavor to do everything reasonable within our power to help you succeed with the stock we send you. No firm is more careful in filling orders; we use every reasonable means to learn the customer's wishes without delaying the shipment. Your interests are our interests and we assure you of the best treatment, whether the order is large or small.

JAPANESE GARDENS AND ROCKERIES

For the construction of Japanese Gardens, Rockeries, etc., we offer the services of Mr. T. R. Otsuka, Landscape Architect to those of our trade customers desiring his assistance. Mr. T. R. Otsuka has had plenty of experience along this line, having built some of the most notable Japanese Gardens in this country and Europe. Arrange with us for an interview or write for complete information.

SCENES IN HILL'S NURSERY

Automobile Road Map.

HOW TO REACH OUR NURSERIES

¶ Visitors are always welcome. We are conveniently located only 38 miles northwest of Chicago.

¶ When coming by the way of Chicago, you are directed to the C. & N. W. depot on Madison street, from where there is an interesting ride through the famous Fox River valley dairy district, of one hour and thirty minutes, direct to the nursery.

¶ For an hourly service from Chicago's shopping district, take the A., E. & C. electric line at Fifth avenue and Jackson boulevard direct to Elgin, transferring to the Carpentersville car, getting off at stop No. 4, Dundee, from where it is but a 2-minute walk direct to our office, which is located right on the nursery grounds.
